“Promoting, Protecting and Nurturing the Health of our Community”

Family Planning Program

The Family Planning Program is designed to enhance the health of clients through client-centered, high quality, and inclusive reproductive health education and services. These services include but are not limited to client education, physical exams, laboratory testing, basic infertility services, cervical and breast cancer screening, STI testing, treatment, education and referral, pregnancy diagnosis and counseling, exploration of pregnancy intention, and education regarding a wide range of birth control methods.

Maternal Health Program

The Maternal Health Program offers access to early and continuous care to individuals during pregnancy. These services include exams, laboratory testing, genetic screenings, counseling, education throughout the pregnancy, and referrals as needed.

Women, Infants and Children (WIC)

The WIC Program provides supplemental food and nutrition education for women, infants, and children (under five) who are at nutritional risk. WIC also provides breastfeeding support. This institution is an equal opportunity provider.

Care Management for At-Risk Children (CMARC)

CMARC is a free program to help families improve the health outcomes of their children from birth to 5 years of age. The program strives to connect families with services; support families with children to reach their developmental potential; and ensure that children have healthy, safe, and nurturing environments.

Immunization Program

The Immunization Program provides adult and childhood immunizations. Immunization services help prevent the spread of vaccine preventable diseases by assuring individuals are age-appropriately immunized and by managing outbreaks of vaccine preventable diseases.

Communicable Disease Program

The Communicable Disease Program works to control the spread of communicable diseases in the community. These services include detection, tracking, investigation, control,

education, and care activities. Communicable diseases can include but are not limited to rabies, tuberculosis, vector-borne illnesses, and foodborne illnesses.

Sexually Transmitted Infection Program

The Sexually Transmitted Infection (STI) Program is designed to decrease the incidence of STIs, improve integration of STI services within the clinical setting, and increase awareness regarding STI services. These services include free exams, testing, education, and treatment. Condoms are always free and readily available.

Care Management for High-Risk Pregnancies (CMHRP)

CMHRP is a care management service provided for pregnant recipients who are identified to be at risk for poor birth outcomes and meet program requirements. It helps pregnant women obtain needed services to improve the quality of maternity care, improve birth outcomes, and provide continuity of care.

Health Education

Health Education provides educational opportunities and resources to help Personians make informed decisions about their health. Health Education is also responsible for assessing and addressing county health needs with partners, as well as coordinating agency accreditation, a Diabetes Prevention Program, tobacco prevention and cessation programs, etc.

Environmental Health

Environmental Health is responsible for providing services that protect and promote public health. Services include food and lodging inspections, the design and inspection of onsite wastewater disposal systems, the inspection and monitoring of private water supplies, and the investigation of environmental health complaints. Environmental Health is located in the Morgan Street Government Center (325 South Morgan Street, Roxboro, North Carolina 27573). Hours of operation are Monday through Friday from 8:30 a.m. to 5:00 p.m.

Emergency Preparedness

Public health has critical responsibilities related to all hazards including those natural, technological, and man-made. The department manages the Strategic National Stockpile (SNS) which provides additional medical countermeasures to local emergency responders including public health during a disaster. The SNS medical supplies also support public health's efforts to provide medications during disease outbreaks. Public health works closely with emergency responders to keep our community safe.

Vital Records

Person County Health Department serves as the Registrar for vital records and assures all births, deaths, and fetal deaths occurring in the county are properly registered.

EMERGENCY ALERT

Person County Prepare is Person County’s Emergency Notification System. This system is used to communicate operational updates and alerts to County residents and businesses. Registered users have access to emergency alerts from Person County including:

- Public safety and emergency-related warnings.
- Time-sensitive notifications.
- Wide-spread infrastructure service disruptions.

Alerts and notifications can be sent via text, email, and/or a phone call. To register to receive Emergency Alerts from Person County, go to www.personcountync.gov (Government–Emergency Services–Emergency Alerts

–“Register Here”). This service is provided to Person County at no cost; however, message and data rates may apply depending on the provider and phone services.
